Tin and film

We are currently the benchmark of the Spanish market and we are present in more than 25 other countries, and that is why our net of representatives can give support and guarantee technical assistance all over the world.

TECHNICAL SUPPORT

We use a large part of its resources in the Technical Assistance department, since we consider that customer service is the best way to establish long-lasting bonds with the manufacturer.

Maintaining trust through time is the best guarantee to ensure that we will continue to cooperate in the future, whatever their needs might be.
